- C.Inhalation : Discard contaminated clothing and shoes, and keep personal away. If breathing is difficult, administer oxygen If inhaled or swallowed, do not perform the inhalation phase of breathing Take an emergency medical examination by a doctor Perform the artificial respiration using the pocket mask installed the one way valves, or other inhaled medical devices. If the cessation of breathing may occur, perform the artificial respiration Avoid from source of exposure, and then moved into an area with fresh air
- D.Ingestion Contact : It is need to be considered that early removal of some ingested material by cautious gastric lavage must be weighed against potential complications of bleeding or perforation Get a doctor's attention immediately if ingestion of large amounts of materials. Take an appropriate medical treatment depending on the symptoms. Do not induce vomiting, and then if vomiting occurs, keep head below hips to prevent aspiration into lungs. Induce vomiting
- E.Notes to Physician : There is no specific antidote and take an appropriate medical treatment.
